Education

Master of Computer Applications (Software Engineering)

University School of Information Communication And Technology, GGSIPU

2023 - 2025

CGPA: 8.39

Bachelor of Computer Applications

Sri Guru TeghBahadur Institute of Management and Information Technology, GGSIPU

2019 - 2022

CGPA: 9.26

Experience

To The New

Jul 2025 - Present

Software Engineer

Noida, India

- Engineering scalable enterprise-grade web applications using Next.js, Redux, and Strapi within a high-performance production environment.
- Architected dynamic form workflows and reusable component systems, reducing development effort by ~35% and improving code maintainability.
- Optimized application performance using SSR and SSG strategies in Next.js, improving Lighthouse scores by ~30% and reducing page load time by ~25%.
- Delivered production-grade features, critical bug fixes, and UI enhancements while collaborating with cross-functional teams including QA, backend engineers, designers, and clients in agile sprints.
- Integrated and consumed RESTful APIs to build scalable, SEO-friendly, and responsive user interfaces for enterprise-level applications.

To The New

Jan 2025 - Jul 2025

Software Developer Trainee

Noida, India

- Completed hands-on full-stack training in React, Next.js, Express.js, PostgreSQL, and AWS through real-world development assignments and backend API implementations.
- Built responsive frontend interfaces and RESTful APIs while collaborating with senior developers on production-level code and application workflows.
- Contributed to a live client project by supporting feature development, debugging, and performance optimization, improving overall application efficiency by ~15%.

Jogaz Info Pvt. Ltd.

Jul 2024 - Jan 2025

Frontend Developer Intern

Delhi, India

- Developed scalable and reusable UI components using Angular, streamlining frontend development and improving component reusability across modules.
- Optimized frontend rendering and responsive layouts, enhancing application performance and delivering a seamless cross-device user experience.
- Contributed to production-level feature development, frontend integrations, and UI enhancements while collaborating closely with senior developers in an agile environment.

Technical Skills

- **Languages:** C, C++, Java, JavaScript (ES6+), SQL
- **Frontend:** React.js, Next.js, Angular, Redux
- **Backend:** Node.js, Express.js, RESTful APIs
- **Databases:** PostgreSQL, MongoDB
- **CMS & Tools:** Strapi, Git, GitHub
- **Cloud & Deployment:** AWS, Vercel, Netlify

Projects

RateYourProfessor | [LINK](#)

Tech Stack: Next.js, MongoDB

- Built a full-stack review platform using Next.js and MongoDB Atlas, enabling students to anonymously rate professors based on teaching and communication.
- Deployed on Vercel with privacy-focused API routes and responsive UI for a seamless, login-free user experience.

Medcare | [LINK](#)

Tech Stack: Next.js, Express.js, Postgres

- Developed a full-stack healthcare platform with advanced doctor search, appointment booking, and role-based access, powered by Express.js APIs and PostgreSQL.
- Built a responsive Next.js frontend with features like appointment cards, pagination, and authentication for smooth user interaction.

Achievements

- Awarded the **Spot Award** at TO THE NEW — June 2026.
- Awarded the **Star Performer of the Month** at TO THE NEW — November 2025.
- Recognized as an **Exceptional Performer** at the USICT SDC Dev-a-thon 2024 for outstanding performance and problem-solving during the competition.
